

- **Red Rgb, Yellow Rgb, Green Rgb:** These are colors associated with the components.
- **Pressure Sensor (FSR) 1, 2, 3:** These sensors are used to measure pressure.
- **Ultra Sonic Sensor:** This sensor is used to detect or measure distance.
- **Arduino Nano:** A small, flexible, and powerful board for developing interactive projects.
- **Jumper Wire Kit:** Used to connect different parts of an electronic circuit.
- **Power Source:** Supplies power to the circuit.
- **Push Button 1, 2, 3:** Buttons used to manually control the circuit.
- **Breadboard:** A device for prototyping electronic circuits.
- **Resistor:** A component that limits or regulates the flow of electrical current.
